(54) METHOD FOR DISTRIBUTING REGIONAL INFORMATION FOR INFORMATION TERMINAL OF TRAVELING OBJECT

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a method for distributing regional information for the information terminals of traveling objects for allowing small-scaled shop owners or business men of the shopping streets or business organizations of the region to conveniently and inexpensively transmit advertisement information, and for allowing users who visit the region or users who are interested in the region to easily collect the regional information.

SOLUTION: Regional information data stored in a regional information-related data base 4 of a regional information service station 1 such as a CATV station are transferred to a corresponding information service station server 17 for traveling objects available to information terminals 14, 15, and 16 of traveling objects, and data are worked by the information service station server 17 for the traveling objects corresponding to the information terminals 14, 15, and 16 of the traveling objects so as to be provided to those information terminals. Then, users who visit the region or users who are interested in the region can receive the timely regional information data corresponding to the user's requests under the consideration

of the 'valid term' and 'valid time' from the corresponding information service station servers 18, 19, and 20 for the traveling objects, and output it to the information terminals of the traveling objects owned by the users.
